

**Assessment Annotations
for the Curriculum Frameworks**

Communication Arts

Grades 3, 7, and 11

**Missouri Department of Elementary and Secondary Education
Robert E. Bartman, Commissioner of Education**

Assessment Annotations for the Communication Arts Curriculum Framework

This document includes the left-hand column ('What All Students Should Know') and the center column ('What All Students Should Be Able To Do') from *Missouri's Framework for Curriculum Development in Communication Arts K-12*. Next to these two columns has been added a column which includes assessment notes for those grade levels which will be tested in the Missouri Assessment Program (MAP). The annotations found in this column are intended to provide information for administrators, curriculum directors, and teachers concerning what is or is not "fair game" for the new statewide performance assessment in communication arts.

Teacher work groups met in late 1996 and early 1997 to decide which of the seventy-three Show-Me Standards should be assessed by the communication arts portion of the MAP. These teacher groups identified the following list of standards:

Communication Arts Knowledge Standards: 1, 2, 3, and 4.
Performance Standards, Goal One: 1.1, 1.5, 1.6, 1.7, and 1.8.
Performance Standards, Goal Two: 2.1, 2.2, and 2.4.
Performance Standards, Goal Three: 3.1, 3.4, 3.5, 3.6, 3.7, and 3.8.
Performance Standards, Goal Four: 4.1.

Another group of teachers then went through the communication arts curriculum framework and, using the list of standards above as a guide, noted which benchmark statements were fair game for a statewide paper and pencil test.

This teacher group faced an additional problem: the benchmark statements in the curriculum frameworks are at the fourth, eighth, and twelfth grade levels, while the communication arts portion of the new performance test will be given at grades three, seven, and eleven. Therefore, the group also identified those skills which were only *introduced* at the benchmark grade levels, since, for example, it would not be fair on a seventh grade test to assess a skill that is not introduced until grade eight.

At the top of the assessment notes column, the grade level of the test in question is identified (third, seventh, or eleventh). Below this heading, the knowledge benchmark statement from the left-hand column is repeated. In some cases, this benchmark statement has been qualified because only part of the benchmark is assessable on a statewide test. Any modifications made to the original statement are explained in parentheses. Below the knowledge benchmark statement, information is given on each of the performance benchmarks found in the middle column. If the letter is followed by the words "Grade 3 (or 7, or 10) state assessment," this benchmark is considered fair game for the assessment at that level. If the benchmark can not be assessed on the statewide test, it is marked "Local assessment." If *part* of the benchmark is assessable on the state test, the benchmark is modified to reflect the portion of the benchmark that is assessable. The modifications to these benchmarks are explained in parentheses. Finally, if the benchmark *is* assessable on the statewide test, but is not "fair game" for assessment until the next higher testing level, the annotation will say, 'Beyond 3rd (or 7th) grade state assessment.'

Please note that not all of the skills identified here as "fair game" for a state test will show up on the test in any given year.

K-12 Content Overview

As students encounter personal, family, workplace, environmental, and societal problems, they must be prepared to work independently and collaboratively to find solutions. To solve problems successfully, students should use all of the communication arts processes efficiently; they must be able to identify, analyze and articulate the problems that they see; communicate possible solutions clearly; develop and implement plans to solve problems; and document and evaluate the effectiveness of solutions.

By analyzing literature and other texts that they read or view, students can learn much about their problem-solving skills. They should be able to identify the problems faced by characters and real people, evaluate the effectiveness of the solutions attempted, predict outcomes based on their analyses, and apply the lessons learned to their own lives.

Students also receive much practice in practical problem solving as they create written, oral and visual communications. Deciding the best approach to use for a particular audience, the best organizational structure for a piece of writing or speech, the best way to make a point so that it will be clearly understood, and the best way to revise a piece in light of feedback from others are just a few of the many complex problem-solving situations that arise during the process of creation.

III. Recognize and Solve Problems

What All Students Should Know	What All Students Should Be Able To Do	3 rd Grade Assessment Notes
<p>By <i>the end of grade 4</i>, all students should <i>know how to</i></p> <ol style="list-style-type: none"> 1. Apply communication strategies to identify, understand and solve problems.
